Empire and mobility in the long nineteenth century—David Lambert 2020-06-08 Mobility was central to imperialism, from the human movements entailed in exploration, travel and migration to the information, communications and commodity flows vital to trade, science, governance and military power. While historians have written on exploration, commerce, imperial transport and communications networks, and the movements of slaves, soldiers and scientists, few have reflected upon the social, cultural, economic and political significance of mobile practices, subjects and infrastructures that underpin imperial networks, or examined the qualities of movement valued by imperial powers and agents at different times. This collection explores the intersection of debates on imperial relations, colonialism and empire with emerging work on mobility. In doing this, it traces how the movements of people, representations and commodities helped to constitute the British empire from the late-eighteenth century through to the Second World War.

Ethnic Dignity and the Ulster-Scots Movement in Northern Ireland—Peter Gardner 2019-12-11 In this book, Peter Gardner contends that the production of narratives of ethnic peoplehood is an attempt to regain a sense of collective dignity among the previously dominant. Drawing on a wealth of primary data, the chapters explore a variety of core issues including ethnopolitics, social class, political-economic ideology, colonialism, and heteromasculinity. The book concludes by taking a global view of post-conflict ethnic dignity among the once dominant, analyzing the New Africans movement in South Africa, white pride and ethnic whiteness studies, and Maronite Phoenicianism in Lebanon. This will be an important contribution for students and scholars of ethnicity, divided societies and, more broadly, political sociology.

Anti-Catholicism in Northern Ireland, 1600–1998—J. Brewer 1998-09-07 Anti-Catholicism forms part of the dynamics to Northern Ireland’s conflict and is critical to the self-defining identity of certain Protestants. However, anti-Catholicism is as much a sociology process as a theological dispute. It was given a Scriptural underpinning in the history of Protestant-Catholic relations in Ireland, and wider British-Irish relations, in order to reinforce social divisions between the religious communities and to offer a deterministic belief system to justify them. The book examines the socio-economic and political processes that have led to theology being used in social closure and stratification between the seventeenth century and the present day.
